Description:

PLEASE NOTE: This administration has not addressed FY2003-2007 requirements. All FY 2003-2007 budget estimates included in this book are notional only and subject to change.

The Lightweight 155mm Towed Howitzer (LW155) is a Joint USMC/Army Program. The LW155 replaces the M198 Towed Howitzer for both services. A 45% reduction in weight compared to the current system allows for greater strategic and tactical mobility while maintaining or improving range, weapon stability, accuracy, and durability. Battlefield mobility and rates of fire are also significantly improved creating a weapon that is more survivable and lethal. The LW155 includes Towed Artillery Digitization (TAD), a digital fire control system that will replace conventional fire control as the primary system. Conventional fire control will remain as a backup to the digital fire control. TAD will enable the LW155 Howitzer section to emplace faster and without survey, aiming posts or an aiming circle. Digital communications and an on-board antenna eliminate the need for wire to the Fire Direction Center and will increase dispersion and survivability on the battlefield. Modifications to the existing prime mover will enable the howitzer section to navigate, recharge the system and receive fire missions, all while moving to the next firing position. This system supports the Legacy transition path of the Transformation Campaign Plan (TCP).

Justification:

FY02 and FY03 funding supports the procurement of long lead titanium and the procurement of five Lightweight 155mm Towed Howitzers. Funds required for the procurement of long lead titanium are necessary to support titanium plates, cylinders and castings which support the manufacturing of top and bottom carriage assemblies and cradle assemblies. Initial production howitzers will be fielded to the Training and Doctrine Command in FY04. Follow on howitzers will begin fielding to the Interim Brigade Combat Teams, and then to the Active Component's "first to fight" units. Planned procurement of LW155's continues through FY09, completing the Army Inventory Objective of 273 howitzers.
